

Updating your Enigma/Voyager/Odyssey system firmware

To download the latest version of the system software (the 'Enigma.bin' or 'Odyssey.bin' file for those who have Voyagers and Odyssey EFIS systems);

- *Go to the [MGL web site](#);*
- *Move your cursor over the 'Enigma EFIS' link or 'Odyssey EFIS' file for those who have Voyagers and Odyssey EFIS systems;*
- *Left click on the link 'Enigma updates' or 'Odyssey and Voyager MKII updates'*
 - *for those with the earlier G1 systems go to 'Odyssey and Voyager MKI updates';*
- *Then right click on the 'Enigma.bin' or 'Odyssey2.bin' link in the top line of the page which opens;*
 - *for those with G1 systems right click on the 'Odyssey.bin'*
- *Select 'Save file as' or 'Save link as' (depending on your internet browser) and select the folder into which you wish download the file or download direct to an SD card.*

When the file is downloaded to, or copied (after downloading) to, your SD card; with the power off to your Enigma/Voyager/Odyssey insert the SD card; and then turn on the power. The new system software will be automatically installed (you will see this happening on the display) and it takes about 30-40 seconds. The EFIS will then open your start up page.
